## DETAILED ACTION

Claims 1-36 are pending. Claims 4, 15, 16, 18-20, 23 and 31-36 are withdrawn. Claims 1-3, 5-14, 17, 21-22, 24-30 of Group I have been elected with traverse. Claims 5, 21, and 30 of Group I are subject to a supplemental restriction.

### *Election/Restrictions*

Claims 5, 21, and 30 are generic to a plurality of disclosed patentably distinct species comprising the nucleotide sequence set forth in SEQ ID NO: 1, SEQ ID NO: 3, and SEQ ID NO: 5, from maize, human, and yeast respectively. Applicant is required under 35 U.S.C. 121 to elect a single disclosed <sup>sequence,</sup> even though this requirement is traversed. If Applicant elects either sequence SEQ ID NO: 3 or 5, Claims 5, 21 and 30 will be withdrawn from examination, since the elected Group I is drawn to SEQ ID NO: 1.

Applicants are reminded that nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are directed to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq. This requirement is not to be construed as a requirement for an election of species, since each nucleotide and amino acid sequence is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.
